

MAGNETICS

TRANSFERT & LAMINATION TAPES SLURRIES & INKS

Magnetic foils are often seen on the back of banking and payments cards, and also gift cards, loyalty cards and membership cards, which are used in conjunction with a POS system. They are also used for bank books and in access control such parking tickets, or key cards in hospitality.

Magnetic stripes are essential to support the legacy of payment and access control apparatus all over the world, and that is why manufacturers must continue to integrate magnetic support on their cards. It remains the cheapest way to record and store data, and combined with some security factors, stay the primary way to produce cards at best costs.

WE ENSURE FOR YOUR PRODUCTS QUALITY, BEST COSTS & SECURITY

COLOR TAPES

Even if using black and brown is a standard, it is possible to create magnetic tapes of any PANTONE color. This combine an identity and a point of control, through the specific color used for the stripe.

LOGO TAPES

Those tapes give the ability to brand at low cost the cards while giving them a unique identity. Any logo including graphics and colors can be stamped on the stripes.

ASSOCIATED PRODUCTS / MACHINES

We also provide analyzers and testers which perform quality control on magnetic stripes:
NTMAGII | NTMAGIII | PST-E | TUS-A | ATT-A

We have the capabilities in place to accommodate an endless combination of size, shape, adhesive, and film to meet your specific magnetic striping. Our customers use them either on PVC or on paper.

We still innovate on magnetic stripes.

Our research and development department is constantly working to create new products for our customers to adapt to the market needs while keeping and improving the quality and optimizing the security of magnetic stripe, as we meet ISO standard specifications. Our magnetic products are recognized worldwide for their quality and reliability.

DOUBLE SIDE TAPES

They give the ability to create new cards design and style, based on transparent plastic. Gold, Silver or any color tapes can be part of the design itself and visible on the front side. Translucent cards are a new trend, perceived as high-end cards.

OVERPRINTABLE TAPES

With overprintable tapes, you can keep the properties of the magnetic stripe, and hide them under the overprint.
